

The Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Dear The Federal Communications Commission,

I strongly urge you to support the "Fair Share Plan" as a solution to current concerns with the Universal Service Fund (USF).

I can barely afford adequate phone service as it is. You can imagine how well I like the idea of my paying a REGRESSIVE flat tax!

My current phone service solution has been an inexpensive, prepaid Tracfone cellphone which I use only rarely. Many months, the proposed tax would exceed the total amount I will spend on my phone service.

No one who doesn't have a financial interest at stake could consider the proposed USF tax as anything other than just another concession to big business.

cc: Marlene Dortch, Secretary

Sincerely,

Karen Gustafson
